-- Th MAILING DATE of this communication appears on the cover sheet with the correspondenc address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 11 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

## Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### **DETAILED ACTION**

1. A review of the record appears that the examiner checked the wrong box (2c – they are not deemed to place the application in better form...) on the advisory action, the correct box is 2a, the amendment raises new issues that would require further consideration and/or search). For this reason, confusion has been introduced into the record and the examiner will enter and consider the amendment.
2. Entry of an amendment After Final is not a matter of right, as implied by applicant's brief, but is at the examiner's discretion when further consideration or a new search would be required.
3. Applicant's arguments regarding the combination of Ohrn and Stannis are not convincing, Ohrn teaches the use of the reservation system from a doctor's office for hospital admissions (reservations), but does not teach the detail of entry of medical conditions, Stennis teaches entry of medical conditions, it is well known in the hospital environment to have different wards that patients are admitted to and would have been obvious to one of ordinary skill in the art for the purpose of properly caring for a patient, eg a cardiac patient would not be admitted to the maternity ward, because the treatment requirements and equipment are different.
4. Applicant's arguments regarding the status of the internet and websites as being old and well known at the time of applicant's invention are not convincing. The internet was old and well known by the April 2000 filing date.

Art Unit: 3629

5. Applicant's arguments regarding Ohrn's teaching regarding databases, networks, and remote servers are not convincing, all were well known at the time of applicant's invention and all are obvious to the use of applicant's invention.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-2, 4-8, 11, 12-16, 19-20 are rejected under 35 U.S.C. 103(a) as being anticipated by Ohrn (6,356,874) in view of Stanis et al ('4,135,241).

As per Claim 1, 14.

Ohrn ('874) discloses:

providing a network, see column 7, lines 60-66 and figure 1;

providing a database connected to the computer network, see figure 1;

inputting bed availability information for a plurality of healthcare facilities, wherein each of the plurality of healthcare facilities have beds and further wherein the bed availability information is input into the database and is accessible by the computer network, see column 6, lines 6-45, column 7, lines 60-66 and column 10, lines 22-30;

providing a first access to the database for finding the bed availability information by a user of the database, see column 6, lines 6-45.

Ohrn ('874) further discloses searching a database based on user entered criteria for the bed availability information, see column 5, lines 37-63.

Ohrn ('874) does not specifically disclose entering individual medical condition of a patient.

Stanis et al ('241) teaches availability of beds and the information about the patient occupying the bed, see column 3, lines 14-25 for the benefit of managing the status of beds in a hospital.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to include patient conditions and availability of beds in the invention of Ohrn ('874) as taught by Stanis et al ('241) for the benefit of accurately placing patients in the correct ward.

As per Claim 2.

Art Unit: 3629

Ohrn ('874) further discloses providing the database on a network, see figure 1.

As per Claim 4.

Ohrn ('874) further discloses contacting one of the healthcare facilities after retrieving information about the healthcare facility, see column 10, lines 22-30 and column 5, lines 37-45.

As per Claim 5.

Ohrn ('874) further discloses providing a remote server storing the database, see figure 1.

As per Claim 6.

Ohrn ('874) further discloses providing a second access to the database wherein an extended care or a healthcare facility having beds enters the bed availability into the database via the second access, see column 5, lines 37-41, column 7, lines 44-50 and column 10, lines 22-30.

As per Claim 7, 19.

Ohrn ('874) further discloses an individual healthcare facility accesses the database to input the bed availability information for the individual healthcare facility, see column 5, lines 37-41, column 7, lines 44-50 and column 10, lines 22-30.

As per Claim 8, 15.

Ohrn ('874) does not specifically disclose bed availability includes a quantity of beds.

Stanis et al ('241) teaches a quantity of empty beds available, see column 7, line 43 – column 8, line 8 and column 3, lines 14-25 for the benefit of managing the status of beds in a hospital.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to include a quantity of beds available in the invention of Ohrn ('874) as taught by Stanis et al ('241) for the benefit of managing the status of beds in a hospital.

As per Claim 9, 16.

Ohrn ('874) does not specifically disclose bed availability includes types of beds available.

Stanis et al ('241) teaches a types of beds, see column 7, line 43 – column 8, line 8 and column 3, lines 14-25 for the benefit of managing the status of beds in a hospital.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to include a quantity of beds available in the invention of Ohrn ('874) as taught by Stanis et al ('241) for the benefit of managing the status of beds in a hospital.

As per Claim 11.

Art Unit: 3629

Ohrn ('874) further discloses searching the database for the bed availability information, see column 5, lines 37-63;

matching healthcare facility criteria with patient needs, see column 5, lines 37-41 and column 10, lines 22-30.

As per Claim 12.

Ohrn ('874) further discloses searching a database based on user entered criteria for the bed availability information, see column 5, lines 37-63.

Ohrn ('874) does not specifically disclose entering individual medical condition of a patient.

Stanis et al ('241) teaches entering medical information, see column 3, lines 14-25 and column 4, lines 23-36 for the benefit of managing the status of beds in a hospital.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to include a quantity of beds available in the invention of Ohrn ('874) as taught by Stanis et al ('241) for the benefit of managing the status of beds in a hospital.

As per Claim 13, 20.

Ohrn ('874) further discloses a means for searching, see column 37-63.

As per Claim 17.

Ohrn ('874) further discloses the bed availability information includes a projection of expected availability of beds at a facility in a specified time frame, see column 5, lines 37-63.

7. Claims 3, 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohrn (6,356,874) in view of Stanis et al ('241) further in view of Bruno et al (6,289,088).

As per Claim 3.

Ohrn ('874) does not specifically disclose the network is the internet.

Bruno et al ('088) teaches use of the internet as a less expensive alternative to long distance service, see column 5, lines 34-56.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to use the internet as a less expensive alternate network as taught by Bruno et al ('088) in the invention of Ohrn ('874).

As per Claim 10.

Ohrn ('874) further discloses an online form for accessing the database and inputting information, see figure 3.

Ohrn ('874) does not specifically disclose the network is the internet.

Bruno et al ('088) teaches use of the internet as a less expensive alternative to long distance service, see column 5, lines 34-56.

Art Unit: 3629

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to use the internet as a less expensive alternate network as taught by Bruno et al ('088) in the invention of Ohrn ('874).

8. Claims 10, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohrn (6,356,874) in view of Stanis et al ('241) further in view of Bruno et al (6,289,088).

As per Claim 10, 18.

Ohrn ('874) further discloses an online form for accessing the database and inputting information, see figure 3.

Ohrn ('874) does not specifically disclose the network is the internet.

Bruno et al ('088) teaches use of the internet as a less expensive alternative to long distance service, see column 5, lines 34-56.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time the invention was made to use the internet as a less expensive alternate network as taught by Bruno et al ('088) in the invention of Ohrn ('874).

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas A. Dixon whose telephone number is (703) 305-4645. The examiner can normally be reached on Monday - Thursday 6:30 - 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Weiss can be reached on (703) 308-2702. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
